SUMMARY

Backend JavaScript Engineer with 5+ years of experience building and scaling Node.js services, executing large-scale data migrations, and optimizing search with Elasticsearch. Experienced in backend development, DevOps, CI/CD, Docker-based infrastructure, SQL/PL/pgSQL, and Keycloak. Delivered production systems, extended Strapi CMS with custom backend solutions, and applied TDD and AI-assisted development tools such as Claude Code. Former professional chess player and trainer.

PROFESSIONAL EXPERIENCE

Backend JavaScript Engineer (Middle → Senior)

May 2023 - Present

Devs Software Design, UAE - (Remote, Full-time)

- Rebuilt the Arabian Gulf Digital Archives platform, improving performance, scalability, and long-term maintainability while migrating 3M+ records, including high-resolution images and files.
- Designed and implemented an Excel data processing pipeline for upload, validation, parsing, and normalization, reducing manual data entry by 90%.
- Extended Strapi CMS with custom backend services, plugins, analytics, AI-generated summaries, an image editing tool, and UAE PASS authentication.
- Optimized Elasticsearch search, reducing response times from ~3s to ~250ms.
- Managed a containerized, multi-service platform using Docker Compose, Caddy, PostgreSQL, Keycloak, and Garage S3.
- Designed GitLab CI/CD pipelines for Docker builds, deployments, isolated feature environments, database resets, and remote integration testing.
- Automated feature-branch deployments with dynamic DigitalOcean domains/DNS and built a Slack deployment bot for CI/CD workflow automation.
- Managed production and test infrastructure across a multi-service Docker environment, covering deployment, networking, TLS, monitoring, logging, and troubleshooting.
- Built a backend functionality for customer management, Stripe billing, and deployment instances across cloud and on-premise Ubuntu/CentOS environments, including secure agent communication and file transfer.

Backend JavaScript Engineer (Senior)

Apr 2025 - Feb 2026

Gambits GmbH, Germany - (Remote, Freelance)

- Engineered chess functionality, including game logic and move validation, for a production application.
- Developed social features including follower management and player blocking.

JavaScript Engineer (Middle)

Sep 2023 - Aug 2024

Powered By Love consultancy, USA - (remote, Freelance)

- Integrated cloud-based OTP verification and Stripe payments.
- Mentored 3 junior developers through code reviews, pair programming, and knowledge sharing.
- Applied TDD to critical services, achieving 87% test coverage.

Backend JavaScript Engineer (Junior → Middle)

Oct 2021 - May 2023

The SDC, Armenia - (Remote, Full-time)

- Built a company management system with two-way SQL/Google Sheets synchronization, reducing manual reconciliation by 90%.
- Created a Tauri desktop application for automated directory scanning and Excel report generation, reducing processing time by 95%.
- Delivered an admin panel for a global biometric authentication platform, reducing administrative workload by 60%.

OPEN SOURCE PROJECTS

Ararat Region Chess Federation - Open source Website

Website Source code

- Led the full development lifecycle, from architecture and implementation to deployment, delivering a scalable multilingual platform supporting 3 languages.
- Integrated Strapi CMS, enabling non-technical administrators to manage content independently.
- Built a custom news generation system, reducing article creation time from ~40 minutes to under 5 minutes while standardizing formatting.
- Systematized live rating tables and tournament updates, providing real-time player performance data and eliminating manual data entry.

Chess Arbiter educational open source platform

Website Mobile app Source code

- Maintained the multilingual Chess Arbiter platform across web and mobile, providing comprehensive chess rules, tournament systems, tie-break criteria, and Elo rating documentation for players, trainers, and arbiters.

Chess Engine

Engine Source code

- Implemented a chess engine for position evaluation and legal move generation, achieving an estimated playing strength of ~1300–1400 Elo.

TEACHING EXPERIENCE

Chess trainer - Ararat region chess federation, Armenia

Sep 2017 - Apr 2021

- Trained children aged 5 to 14 for professional chess tournaments; 5 became professional chess players, 2 of whom compete in the final round of the Youth Championship of Armenia.
- Helped organize 6 regional tournaments and served as an arbiter in 3 of them.

LANGUAGES

English - Advanced

Russian - Fluent

Armenian - Native

EDUCATION

Armenian State University of Economics, master's degree, IT in business, 2022

Armenian State University of Economics, bachelor's degree, International Economic Relations, 2020

Armenian Code Academy, JavaScript BootCamp. A 4-month full-time intensive course, 2021

SKILLS

Languages: JavaScript, TypeScript, Python, SQL, PL/SQL

Backend: Node.js, NestJS, Express, Koa, Strapi CMS, Flask, REST API, GraphQL, WebSocket

Databases & Search: MySQL, PostgreSQL, MongoDB, Redis, Elasticsearch, TypeORM, Mongoose

DevOps & Infrastructure: Docker, Linux, Nginx, Caddy, CI/CD, RabbitMQ, Hatchet, Heroku, Git

Frontend & Mobile: React, Next.js, Vue.js, Angular, React Native, Expo, HTML, CSS, SCSS

Authentication & Integrations: Keycloak, Firebase, Stripe, Bank Integrations/APIs, Twilio, TextGrid

Testing & Tools: Swagger, Jest, E2E Testing, K6, IIPIImage, Tauri

AI-Assisted Development: Claude Code, Cursor
